Visa and U.S. Chamber of Commerce Data Security Workshops

Visa USA has announced that they will be conducting a series of data security seminars in conjunction with the U.S. Chamber of Commerce. The series, which is entitled “Securing our Businesses, Protecting our Customers”, will take place in cities across the country over the next 2 months.

These merchant security seminars will underscore the shared responsibility of all card-accepting businesses to combat fraud. Specifically, Visa and the U.S. Chamber of Commerce will:

- Educate retailers on how they can better protect their businesses against payment card fraud and comply with the PCI data security requirements.
- Favorably impact the industry’s reputation among merchants.
- Reassure cardholders that Visa and merchants are taking action to protect their card information.

These breakfast/lunch seminars will be held in these cities across the U.S.:

Birmingham, AL	Boston, MA
Minneapolis, MN	Springfield, IL
Palm Springs, CA	Cincinnati, OH
Anaheim, CA	San Antonio, TX
Annapolis, MD	Gainesville, FL
Charleston, WV	

We encourage you to share this information with your staff and merchants so that they may take advantage of the opportunity to participate in these seminars if possible. For additional information on the program and registration for the events, please visit:
